Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I want to stay fit and healthy." • "I need a workout plan that suits me." • "I want to track my fitness progress."	THINKS • "Which exercises are suitable for me?" • "How can I stay consistent?" • "Am I making enough progress?"
PERSONA NAME (Role / User Type)	
DOES • Follows workout routines. • Tracks daily fitness activities. • Searches for workouts and healthy habits.	FEELS • Motivated to improve fitness. • Frustrated when progress is slow. • Happy when fitness goals are achieved.
