

Project Initialization and Planning Phase

Date	30 SEPTEMBER 2026
Team ID	SWTID-2026-1418
Project Title	FIT BUDDY AI
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

FitBuddy is a mobile fitness application designed to transform the fitness journey using personalized workout plans, progress tracking, motivation tools, and habit-building support. It addresses common problems such as lack of guidance, low motivation, limited time, and inconsistent workout routines, helping users achieve their fitness goals in a simple and sustainable way.

Project Overview	
Objective	The primary objective is to improve the fitness journey by providing personalized workout plans, progress tracking, motivation, and beginner-friendly fitness guidance.
Scope	The project focuses on developing an efficient and user-friendly fitness system that provides personalized workouts, progress tracking, reminders, habit support, and accessible routines for different fitness levels.
Problem Statement	
Description	Many users struggle with inconsistent workouts, lack of motivation, limited guidance, lack of time, and difficulty maintaining a regular fitness routine. FitBuddy addresses these problems through personalization, progress tracking, reminders, and continuous support.
Impact	Solving these issues can help users maintain consistent workout habits, improve their fitness level, stay motivated, and develop a healthier daily routine.
Proposed Solution	
Approach	FitBuddy uses user information and workout progress to provide personalized workout plans. The system can analyze user activity, track progress, and adapt workout recommendations based on the user's progress and feedback.
Key Features	Personalized beginner-friendly workout plans Progress tracking and analytics Daily workout reminders

	Habit-building support Simple and accessible workout routines Workout tracking Fitness goal setting User-friendly interface

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	T4 GPU
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	1 TB SSD
Software		
Frameworks	Python frameworks	Flask
Libraries	Additional libraries	Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn
Development Environment	IDE	Jupyter Notebook, pycharm
Data		
Data	Source, size, format	Kaggle dataset, 614, csv UCI dataset, 690, csv
